

English

In English, the children will continue to practise their handwriting and learn weekly spellings. They will also explore a poetry unit and a writing unit, developing their understanding of language features, word classes, and how to use vocabulary with greater richness and effect. Throughout these units, the children will be encouraged to build variety into their writing and apply new skills to make their work more engaging and expressive.

Some children will join phonics sessions in the junior area to continue strengthening their reading skills.

Autumn 1 Year 3

Teacher: Miss Chambers

welcome

Maths

In Year 2, and previous small steps, children have counted in tens within 100. This unit provides the opportunity to explore 100 explicitly for the first time. Children should be able to confidently count in 100s before looking at the structure of 100. In this unit it provides the opportunity to explore 100 explicitly for the first time. Children should be able to confidently count in 100s before looking at the structure of 100.

Geography

In Geography, the children will be learning about our local area. They will develop their map skills by locating the local area and giving directions. They will also explore both physical and human features, as well as identifying the different types of services we use in our community. Along the way, the children will collect and record evidence to support their learning.

Computing

To develop their understanding of digital devices, with an initial focus on inputs, processes, and outputs

RE– What makes us special?

PSHE– Me and my relationships

Music – Let your spirit fly

PE– Health Related Fitness

PE days are a Wednesday and Friday

Please can reading books come into school daily.

Science

In our Science topic on *Light*, children will explore light sources, reflections and shadows. They will take part in hands-on investigations, design challenges, and learn how light helps us see while also understanding how to stay safe in the sun.
